

# Plant Doctor Training

## Step 1

Which human diseases can you name? What do you think causes these diseases?

Can you draw a line to match these human diseases with plant diseases?

## Step 2

What are the symptoms of this plant disease? Do you think the plant has a fungal or viral disease?

## Step 3

Can you draw a picture to show the differences between a healthy plant and a sick plant?

Healthy plant	Diseased plant

Created by the British Society for Plant Pathology (2013)
